

For Immediate Release

Cranes Software to distribute products of ETA of USA

Bangalore, February 14, 2007: Cranes Software International Ltd (CSIL) the Bangalore based Global Scientific and Engineering Software Products and Solutions Company announced today that it has concluded an agreement with Engineering Technology Associates (ETA) of USA. Under this agreement CSIL would distribute and support ETA's DYNAFORM & VPG products across India.

CSIL would hold a series of workshops and product demonstrations to both increase the awareness as well as educating the user base of eta/DYNAFORM and eta/VPG. eta/DYNAFORM is a set of tools which enable die design engineers to evaluate the performance of stamping dies prior to physical prototype stamping dies. The eta/VPG is a suite of tools used in the development of finite element models, which includes tools that enable engineers to quickly and reliably develop complex models for durability and vehicle crashworthiness.

Speaking on the occasion Mr. Pradeep Kumar, Executive Vice President of Cranes Software comments, "Our association with ETA will enhance our product portfolio especially for the transportation industry. VPG in combination with LS-DYNA will help our customers handle explicit dynamic analysis problems like crash, impact, safety and drop tests which are of critical importance in today's transportation and consumer electronics industry. They will complement Crane's general-purpose FEA software tools, NISA. With Dynaform, Cranes will enter the manufacturing sector with a world-class metal forming solution especially addressing die and stamping analyses needs. This strategic alliance, with synergies in products, services, and customer profiles, will better serve our clients with greater product breadth and depth."

About Cranes Software International Limited

Cranes Software is a Global Scientific & Engineering Software Products and Solutions Company. The Company's business interests span Products, Solutions, Services and R & D in future technologies. Cranes Software addresses the Scientific & Engineering software related needs of large multinational companies, governments, defense establishments, educational and research institutions.

Today, Cranes Software has its presence in 38 countries across the world and has a 350,000 strong global user base. Cranes Software offers a range of proprietary products –

NISA, SYSTAT, SigmaPlot, SigmaStat, SigmaScan, TableCurve 2D, TableCurve 3D, PeakFit, AnalytiX, iCapella, Alerts, InventX and world-renowned products from reputed principals such as Engineering Technology Associates (ETA), The Mathworks, Texas Instruments and IBM.

With a mission statement to provide its customers the best in scientific technology and to enable its customers to define new limits, Cranes Software is setting new standards in the scientific and engineering field.
