Cranes Software announces the release of NISA/CIVIL Version 15

Bangalore, March 6, 2007: Cranes Software International Ltd. the global scientific and engineering software products and solutions provider today announced the launch of NISA/CIVIL Version 15 – the latest in the series of versions of its industry leading FEA package ‘NISA/CIVIL’. NISA/CIVIL addresses a range of issues of vital significance to architects and civil engineers working with RCC and Steel structures.

NISA/CIVIL Version 15 comes with a host of new features and marks a significant improvement over the previous version. Some of these are:

- Concrete designs conforming to BS 8110-1997, ACI 318 -2005
- Steel plastic designs conforming to BS 5950-1:2000 & Limit Resistance Factor Design (LRFD) 2002
- Drawing Editors for Reinforced Slabs, Beams, Columns, Footings & Shells to generate structural drawings as per American, British & Indian Standards
- Drawing Editors for Steel Structures to generate General Arrangement drawings as per American, British & Indian Standards
- Improved drawing generations for Slabs, Beams, Columns, Footing Layout, and Steel General Arrangement drawings as per American, British & Indian Standards
- Generation of Design Reports in ASCII, MS-Word, MS-Excel formats

Commenting on this occasion Dr. Ramdass Keshavamurthy, Vice President, Product Development said, “The new version of NISA/CIVIL has been developed with a strong emphasis on the requirements of structural engineers focusing on the British and American steel and concrete building construction industry. These enhancements are significant additions to the capabilities already offered to the Indian building construction

industry. The Version 15.0 of NISA/CIVIL further adds on to the already established competence and user friendliness of its earlier versions.”

About Cranes Software International Limited

Cranes Software is a Global Scientific & Engineering Software Products and Solutions Company. The Company's business interests span Products, Solutions, Services and R & D in future technologies. Cranes Software addresses the Scientific & Engineering software related needs of large multinational companies, governments, defense establishments, educational and research institutions.

Today, Cranes Software has its presence in 38 countries across the world and has a 350,000 strong global user base. Cranes Software offers a range of proprietary products - NISA, SYSTAT, SigmaPlot, SigmaStat, SigmaScan, TableCurve 2D, TableCurve 3D, PeakFit, XID, XIP, Survey ASYST, iCapella, InventX and world-renowned products from reputed principals such as Engineering Technology Associates (ETA), Livermore Software Technology Corporation (LSTC), The Mathworks, Texas Instruments and IBM.

With a mission statement to provide its customers the best in scientific technology and to enable its customers to define new limits, Cranes Software is setting new standards in the scientific and engineering field.
